

## Supplementary file 1

Table IV. Development in time spent on sports (h/wk) and screen-time (TV and computer) during leisure time (h/d) among 4-14-year-old Danish boys and girls in 2000-2002, 2003-2004 and 2005-2008. Results are presented as means and 95% CI.

	<b>Boys</b> (N = 845)			<b>Girls</b> (N = 815)		
	2000-2002	2003-2004	2005-2008	2000-2002	2003-2004	2005-2008
Sports	1.8 (1.6;2.1)	2.2 (1.8;2.6)	2.0 (1.6;2.3)	1.1 <sup>b</sup> (0.9;1.3)	1.8 <sup>a</sup> (1.5;2.1)	1.7 <sup>a</sup> (1.5;2.0)
Screen-time	2.0 <sup>b</sup> (1.9;2.2)	2.3 <sup>a</sup> (2.1;2.5)	2.4 <sup>a</sup> (2.3;2.5)	1.8 <sup>b</sup> (1.7;1.9)	2.1 <sup>a</sup> (1.9;2.2)	1.8 <sup>b</sup> (1.7;1.9)

Values within a column with unlike small superscript letters (a,b) were significantly different between survey years ( $p < 0.05$ ) based on univariate linear regressions analyses.
