

Please clean your hands

- protect yourself and others against infectious diseases

Wash your hands with soap and water or use hand disinfectant.

We recommend that you use soap and water when hands are visibly dirty, and always after using the toilet.

Clean your hands in the following situations:

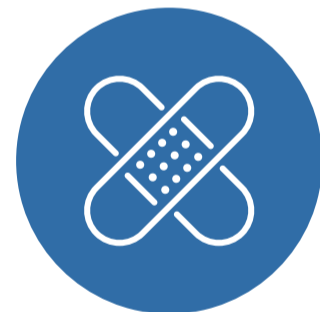

When you have been to the toilet or touched items such as a urine bottle or a mobile toilet chair.

When entering and leaving a patient room or patient bed.

If you are caring for a wound, before and after touching a wound dressing or changing it.

After you have blown your nose, coughed, or sneezed.

Before eating.

If you handle a urinary catheter, before and after touching the catheter.
