Booster protection against confirmed infections and severe disease - data from Israel (& evidence for waning 2nd dose immunity)

Israeli MOH, Gertner Institute, Hebrew university,
Technion & Weizmann Institute of Science

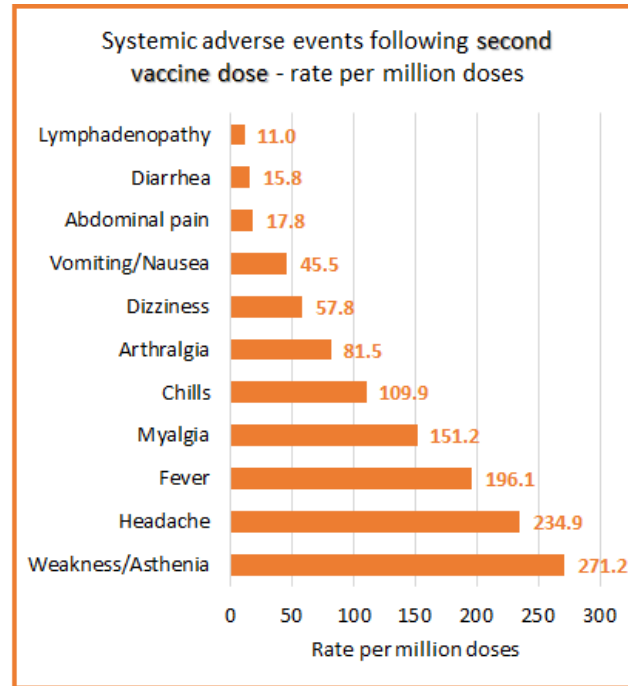

Sept. 1st, 2021

Rate of adverse events following 3rd dose is lower than after 1st or 2nd doses so far (some under-reporting expected in all cases)

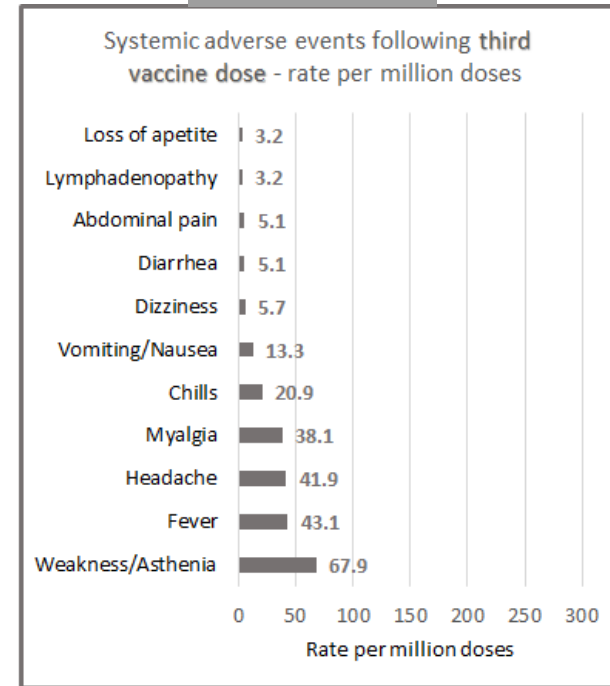

1st dose

2nd dose

3rd dose

Clalit HMO study: adverse events are substantially higher after SARS-CoV-2 infection than after vaccination
